

## our stories so far

real case studies by real parents

SUMMER 2010

**“Our stories so far-** real case studies by real parents” A very special thank you Clive and Mary-Jane Mear of Caddington, Bedfordshire and Susan Burton, Lead Clinical Nurse Specialist, for designing and publishing a new book with the above title, giving the stories of five sets of parents following their children's experiences with CLAPA and the story of their treatment for PRS and cleft palate. The team will use these books to encourage parents who find themselves dealing with the reality of having a baby with a cleft or PRS. The book contains case studies accompanied by pictures, supplied by the parents. The book brings home the reality that having a cleft or PRS is not as rare as you'd think, and that there is help and support on hand. *A chance for new parents to see 'the light at the end of the tunnel'.*
